Human Mobility and Technological Transfer in the Prehistoric Mediterranean Evangelia Kiriati,Carl Knappett,2016-12-24 The diverse forms of regional connectivity in the ancient world have recently become an important focus for those interested in the deep history of globalisation. This volume represents a significant contribution to this new trend as it engages thematically with a wide range of connectivities in the later prehistory of the Mediterranean, from the later Neolithic of northern Greece to the Levantine Iron Age, and with diverse forms of materiality, from pottery and metal to stone and glass. With theoretical overviews from leading thinkers in prehistoric mobilities, and commentaries from top specialists in neighbouring domains, the volume integrates detailed case studies within a comparative framework. The result is a thorough treatment of many of the key issues of regional interaction and technological diversity facing archaeologists working across diverse places and periods. As this book presents key case studies for human and technological mobility across the eastern Mediterranean in later prehistory, it will be of interest primarily to Mediterranean archaeologists, though also to historians and anthropologists.

*Nomads of the Mediterranean: Trade and Contact in the Bronze and Iron Ages* Ayelet Gilboa,Assaf Yasur-Landau,2020-09-07 Three millennia of cross-Mediterranean bonds are revealed by 18 expert summaries in this book, shedding light on environmental factors; the formation of harbors; gateways; commodities; cultural impact; and the way to interpret the agents such as Canaanites, Sea Peoples, Phoenicians and pirates.

**Bronze Age Connections Across the North Sea** J. J. Butler,1963

1177 B.C. Eric H. Cline,2015-09-22 A bold reassessment of what caused the Late Bronze Age collapse In 1177 B.C., marauding groups known only as the Sea Peoples invaded Egypt. The pharaoh's army and navy managed to defeat them, but the victory so weakened Egypt that it soon slid into decline, as did most of the surrounding civilizations. After centuries of brilliance, the civilized world of the Bronze Age came to an abrupt and cataclysmic end. Kingdoms fell like dominoes over the course of just a few decades. No more Minoans or Mycenaeans. No more Trojans, Hittites, or Babylonians. The thriving economy and cultures of the late second millennium B.C., which had stretched from Greece to Egypt and Mesopotamia, suddenly ceased to exist, along with writing systems, technology, and monumental architecture. But the Sea Peoples alone

could not have caused such widespread breakdown. How did it happen? In this major new account of the causes of this First Dark Ages, Eric Cline tells the gripping story of how the end was brought about by multiple interconnected failures, ranging from invasion and revolt to earthquakes, drought, and the cutting of international trade routes. Bringing to life the vibrant multicultural world of these great civilizations, he draws a sweeping panorama of the empires and globalized peoples of the Late Bronze Age and shows that it was their very interdependence that hastened their dramatic collapse and ushered in a dark age that lasted centuries. A compelling combination of narrative and the latest scholarship, 1177 B.C. sheds new light on the complex ties that gave rise to, and ultimately destroyed, the flourishing civilizations of the Late Bronze Age—and that set the stage for the emergence of classical Greece.

*The Geography of Trade: Landscapes of competition and long-distance contacts in Mesopotamia and Anatolia in the Old Assyrian Colony Period* Alessio Palmisano, 2018-10-31 A reassessment of the Old-Assyrian trade network in Upper Mesopotamia and Central Anatolia during the Middle Bronze Age, this volume examines exchange networks and economic strategies, continuity and discontinuity of specific trade circuits and routes, and the evolution of political landscapes throughout the Near East.

**The Kingdom of Alashiya** Charles River, 2021-01-15 \*Includes pictures \*Includes a bibliography for further reading  
International trade in the ancient world was a more intricate and far-reaching system than many have been led to believe. The Silk Road and the Incense Trade Route have been heavily researched in recent decades, and the Amber Road trade network dominating northern Europe has become a more prominent area of focus for historians as well. Trade was at the forefront of the Late Bronze Age (c. 1500-1200 BCE), especially in the Near East, where great kingdoms developed a network of trade and diplomacy stretching from Persia to Egypt and from Anatolia (modern-day Turkey) down to Arabia. The system these kingdoms built is well-documented in texts from Egypt, Mesopotamia, Anatolia, and other places, and archaeological excavations have uncovered more. Studies of the Late Bronze Age system have revealed that although it may have lacked the technology of later eras, it was just as sophisticated as any other geopolitical system in terms of the manner in which the kingdoms interacted and conducted business with each other. Most importantly, alliances were formed and dissolved and

trade was carefully negotiated and documented by its members. Most major powers in the system are quite well-known, including Egypt, Babylon, Assyria, Hatti, and Mittani, but one of the members remains fairly enigmatic: the Kingdom of Alashiya. The primary mystery concerning the Kingdom of Alashiya was its precise location, because the known Egyptian, Akkadian, and Hittite texts mentioning Alashiya fail to properly place the kingdom geographically. For years scholars were torn between its possible location, with most believing it was either in Cyprus, Cilicia, or somewhere in Syria, but today, most accept that Alashiya was in Cyprus. Nevertheless, there are still a number of stumbling blocks preventing a true understanding of this Bronze Age culture. Although the people of Cyprus were literate in the Bronze Age, scholars have yet to decipher the Cypro-Minoan script, just as they have been unable to decode the Minoan Linear A script. This inability to read ancient Cypriot script means that scholars are left with no readable Cypriot/Alashiyan list of kings, so a true chronology cannot be constructed. For these reasons, the history of Bronze Age Cyprus and Alashiya have been largely outlined through a combination of archaeological work and mentions in Egyptian, Akkadian, and Hittite texts. Although the record is incomplete, enough is known to suggest that Cyprus was home to thriving kingdoms that played a major role in the development of the Mediterranean and Near East. Indeed, evidence demonstrates that Alashiya became a major power through trade and commerce due to its possession of copper, an incredibly valuable commodity. But eventually, Alashiya suffered the same fate as many of its neighbors at the end of the Bronze Age when it was overwhelmed by the migrations of various warrior bands collectively known as the Sea Peoples. Fortunately, even though the invasions of the Sea Peoples marked the end of Alashiya and the Bronze Age, remnants of the Alashiyan culture persisted and were augmented by Greek and Phoenician culture during the early Iron Age. The Kingdom of Alashiya: The History and Legacy of the Ancient Trading Kingdom on Cyprus during the Bronze Age examines the mysterious kingdom and its relationships with various other kingdoms nearby. Along with pictures of important people, places, and events, you will learn about ancient Cyprus like never before.

*The Oxford Handbook of the Bronze Age Aegean* Eric H. Cline, 2012-01-01 The Greek Bronze Age, roughly 3000 to 1000 BCE, witnessed the flourishing of the Minoan and Mycenaean civilizations, the earliest expansion of trade in the Aegean and wider Mediterranean Sea, the development of artistic techniques in a variety of media, and the evolution of early Greek religious practices and mythology. The period also witnessed a violent conflict in Asia Minor between warring peoples in the region, a conflict commonly believed to be the historical basis for Homer's Trojan War. The Oxford Handbook of the Bronze Age Aegean provides a detailed survey of these fascinating aspects of the period, and many others, in sixty-six newly commissioned articles. Divided into four sections, the handbook begins with Background and Definitions, which contains articles establishing the discipline in its historical, geographical, and chronological settings and in its relation to other disciplines. The second section, Chronology and Geography, contains articles examining the Bronze Age Aegean by

chronological period (Early Bronze Age, Middle Bronze Age, Late Bronze Age). Each of the periods are further subdivided geographically, so that individual articles are concerned with Mainland Greece during the Early Bronze Age, Crete during the Early Bronze Age, the Cycladic Islands during the Early Bronze Age, and the same for the Middle Bronze Age, followed by the Late Bronze Age. The third section, Thematic and Specific Topics, includes articles examining thematic topics that cannot be done justice in a strictly chronological/geographical treatment, including religion, state and society, trade, warfare, pottery, writing, and burial customs, as well as specific events, such as the eruption of Santorini and the Trojan War. The fourth section, Specific Sites and Areas, contains articles examining the most important regions and sites in the Bronze Age Aegean, including Mycenae, Tiryns, Pylos, Knossos, Kommos, Rhodes, the northern Aegean, and the Uluburun shipwreck, as well as adjacent areas such as the Levant, Egypt, and the western Mediterranean. Containing new work by an international team of experts, *The Oxford Handbook of the Bronze Age Aegean* represents the most comprehensive, authoritative, and up-to-date single-volume survey of the field. It will be indispensable for scholars and advanced students alike.

*The Iranian Plateau during the Bronze Age* Collectif, 2020-03-19 The book compiles a portion of the contributions presented during the symposium "Urbanisation, commerce, subsistence and production during the third millennium BC on the Iranian Plateau", which took place at the Maison de l'Orient et de la Méditerranée in Lyon, the 29-30 of April, 2014. The twenty papers assembled provide an overview of the recent archaeological research on this region of the Middle East during the Bronze Age. The socio-economic transformation from rural villages to towns and nations has prompted many questions into this evolution of urbanisation. What was the impact of interactions between cultures in the Iranian Plateau and the surrounding regions (Mesopotamia, the South Caucasus, Central Asia, Indus Valley)? What was the overall context during the Bronze Age on the Iranian Plateau? What was the extent and means of the expansion of the Kuro-Araxe culture? How did the Elamite Kingdom become established? What new knowledge has been contributed by the recent excavations and studies undertaken in the east of Iran? What was the influence of the Indus Valley culture, known as an epicentre of urbanisation in South Asia? What are the unique characteristics of the ancient cultures in Iran? While the urbanisation of early Mesopotamia has been the subject of much debate for several decades, this topic has only recently been raised in respect to the Iranian Plateau. This volume is the product of an international community from Iranian, European, and American institutions, consisting of recognised specialists in the archaeology of the Iranian Bronze Age. It provides an overview of the latest research, including abundant results from current on-going excavations. The current state of archaeological research in Iran, comprising many dynamic questions and perspectives, is presented here in the form of original contributions on the first emergence of towns in the Near and Middle East.

*Supplement to Copper and Tin* James David Muhly, 1976

Atlas of the Ancient Near East Trevor Bryce, Jessie Birkett-Rees, 2016-04-20 This atlas provides students and scholars with a broad range of information on the development of the Ancient Near East from prehistoric times through the beginning of written records in the Near East (c. 3000 BC) to the late Roman Empire and the rise of Islam. The geographical coverage of the Atlas extends from the Aegean coast of Anatolia in the west through Iran and Afghanistan to the east, and from the Black and Caspian Seas in the north to Arabia and the Persian Gulf and Indian Ocean in the south. The Atlas of the Ancient Near East includes a wide-ranging overview of the civilizations and kingdoms discussed, written in a lively and engaging style, which considers not only political and military issues but also introduces the reader to social and cultural topics such as trade, religion, how people were educated and entertained, and much more. With a comprehensive series of detailed maps, supported by the authors' commentary and illustrations of major sites and key artifacts, this title is an invaluable resource for students who wish to understand the fascinating cultures of the Ancient Near East.
